

Senior Advisory Intelligence for Irish Business Leaders

Meridian Intelligence combines forty years of board-level commercial experience with seven specialist managers across the domains that matter most to Irish leaders. Whatever challenge you bring -- a deal, a governance question, a financial matter, a property decision, an AI strategy, a growth opportunity, or an investment -- you are met with serious expertise and grounded analysis.

JOHN WEBB O'ROURKE

Chairman and Strategic Lead

John brings four decades of experience across commercial deal-making, board governance, financial restructuring, property development, and AI adoption. He chairs AHL PLC and serves as Independent Non-Executive Director and Chair of the Audit and Risk Committee of United Hardware Limited. He is the human authority behind every Meridian engagement.

THE SEVEN MANAGERS

1. Commercial and Deal

Commercial transactions, partnership structures, deal evaluation, revenue model design, and term sheet analysis. Turns commercial intent into a structured, negotiable position.

2. Legal and Governance

Irish corporate law, directors' duties, regulatory compliance, board governance, and EU AI Act obligations. Every legal position grounded to primary authority before it is relied on.

3. Finance and Restructuring

Financial analysis, funding structures, investor materials, distressed situations, and restructuring scenarios. Board-level finance advisory calibrated to Irish SME and mid-market reality.

4. Property and Development

Property transactions, title matters, planning analysis, development feasibility, and asset structuring, across residential, commercial, leasehold, and freehold.

5. AI Strategy and Adoption

AI governance frameworks, EU AI Act compliance, readiness assessments, and structured adoption roadmaps for Irish organisations. The EU AI Act applies in full from 2 August 2026.

6. Business Transformation and Growth

Identifying where value is being left on the table: operational inefficiencies, pricing gaps, underused assets, and new opportunities. Delivers structured improvement briefs and growth roadmaps.

7. AI Equity and Investment

AI as an asset class. Structuring arrangements where AI capability is contributed in exchange for equity. Analysing AI-driven valuations. Advising on how businesses and investors should position around AI assets.

HOW MERIDIAN WORKS

You brief John on your challenge. Meridian routes it to the right manager, produces a grounded analysis, and brings it back to John. John directs. You decide.

Meridian is not a report factory. It is an intelligence system in service of better decisions.
