My understanding and action list, in line with Shane's brief and the Chairman aim

1. My understanding

Shane's brief of 8 Oct is the spine. Ten tasks: 1 legal position, 2 share rights and founder control, 3 constitutions, 4 shareholder work to completion, 5 board and decision rules, 6 records and compliance calendar, 7 money across companies, 8 IP and due diligence traceable, 9 safety, data and AI oversight, 10 one usable decision pack. I own 2, 3, 5, 7, 8, 9 and 10 in full, and oversee 1, 4 and 6 with Pat's office doing the filings. Shane's WhatsApp of 3 Nov says focus on what is mine, and note where clarity is needed.

Pat's pack gives the controls and dates; Shane's notes of 30 Oct are still to come and nothing from that meeting is treated as agreed. **The Chairman seat is open** in Pat's chart, and board rules (task 5) are mine to draft, so the work and the aim run together: I earn the Chair by delivering task 5 and the decision pack well, then take it to Shane as a conversation and a board decision. The group meets each Friday until the structure is in place.

2. Actions

When	Action	Task or source
Wed 4 Nov	Get the Cork IP solicitor's name and details from Pat (emailed 3 Nov). Call Pat's mobile if there is no reply by midday.	IP route
	Set up scoping meetings with the Cork solicitor and Barry Scannell (William Fry). Same agenda, conflict check each, no documents before confidentiality terms and Shane's alignment. Tell Shane. Pat is also due to obtain quotes today: agree who approaches whom, so nobody is approached twice.	Task 8 Pat pack
	Ask Pat for the review points due today, and the existing-company listing.	Task 1
	Agree with Shane, in conversation, who compiles the commitments record (you or Tom) and a new date, since 2 Nov has passed.	Task 4
By Fri 6 Nov	**Task 1:** one verified company summary. Five registered with CRO numbers (Noesis 805939, Asterial 804907, Zubelsala 817481, SanCelvio 817480, Mainly Velocity 804908), two in incorporation (Tairseach, Odin Labs), nine with no evidence. Cuan prepares, John checks against the CRO register, gaps named.	Task 1
	Task 2: the share-rights issues: reconcile the earlier Pat-to-Shane transfer and paid-up capital, test the 83/17 structure and B protection against the Documents, list decisions Shane must make before signing.	Task 2
	Task 5: draft the board and decision rules: board arrangements, Friday rhythm, spending limits, reserved matters, quorum, ties, conflicts, temporary authority if Shane is unavailable. This is the Chairman groundwork.	Task 5
	Tasks 4 and 6: a dated completion plan with named blockers, and the next 90 days of obligations with who prepares, checks and files each item. Settle with Pat's office which companies Shane has asked them to incorporate.	Tasks 4, 6
	Task 9: get Tom's security presentation and agree what I challenge and what he owns.	Task 9
	Task 10: one page for Friday: decisions needed, information only, my recommendation, and a recorder named so 6 Nov is minuted.	Task 10
Separately with Shane first	Pat's possible sale of the practice and what it means for registers, filing agent status and a replacement firm. No approach to any firm before Shane and I have spoken.	Task 6
	Side projects: Meridian is not incorporated; agree register, boundary and incorporation before any Meridian fee or client IP.	Task 7
	Money across companies (Asterial to Noesis, intra-group licences) reviewed before each payment or commitment.	Task 7
Weekly, each Friday	Update the one-page action list, bring decisions not information, and have the outcome minuted.	Task 10

3. Chairman track

(1) Deliver task 5 rules and the decision pack. (2) Raise the seat with Shane in conversation, not in writing. (3) Have it recorded as a board decision after the board rules are agreed. (4) Settle my role, time commitment and terms with independent review, as a separate step. (5) Hand day-to-day secretary and filing work to the group office while I keep the Chair. Group Chairman follows when the group board exists.

Until the project system is live: this list is the system. Cuan keeps it in the dashboard, updates it daily from what you tell it, and gives you one page each Thursday for Friday. Every outward action stays with you.
