Pat Carroll's papers on one page

About 40 pages dated 28 October 2026, prepared for the founders' meeting of Friday 30 October (Shane, Pat, John, Tom). They are a framework of evidence, owners, dates and "blockers". They do not record what was decided. Shane's reaction (WhatsApp 3 Nov): "lot of gold there".

Paper	Pages	What it says
Founders meeting and planning pack	14	The 12-item agenda (four hours); speaking notes for Pat; organisation chart; "choose the solicitor route" table; ten recommendations to start delivery; Irish legal and tax references and CRO deadlines; a ten-KPI sheet; an outcomes table (owner, next step, deadline) left blank for the meeting.
Business plan working document	9	Parent is Noesis AI Agent System Limited (CRO 805939), first product the AI project-management agent. Proposed ownership; roles table; 30/60/90-day milestones; risks; decision register; assumptions. A working structure, not a forecast.
Commitments, offers and marketing record	5	One controlled record of every promise, offer and marketing version (signed, unsigned, verbal, email, real estate, Dubai). John proposed as master compiler, Tom collects offers, Shane confirms facts, Pat reviews only. Templates and a six-folder access structure.
IP solicitor scope, cost and funding	3	Three routes: John alone, an IP specialist alone, or both with defined roles. Three phases (urgent IP and contracts; governance and structure; implementation). No fee figure and no cash source yet. Independent review of John's own award and appointment required.
Cash flow template	1	36 months, November 2026 to October 2029, every figure zero. Pat says it is a working structure, not a forecast of no liabilities.
"Shane decisions list" and "Recommendations"	2	Pat's preparation pages for Shane; numbered decisions (the solicitor route, who compiles and approves disclosure, roles and authority including Pat's transition). Detail still to be read against Shane's notes.

Pat's main positions

- **Nothing is treated as done.** Shane holds 100% today. The proposal is Shane 83% voting A shares, fourteen non-voting B holders 17% (eleven at 1%; Pat, John and Tom 2% each). Shane's family 15 points would come from his 83%. Not issued, not filed.
- **Records before decisions.** Verify capital and title, settle constitutions, transfer subsidiaries, value, then award shares. Clear CAT, CGT and stamp duty first. Meet CRO deadlines: directors 14 days, resolutions 15, allotments 30.
- **Roster missing.** Pat says the existing-company listing is not in the material available to him; Grassroots Gazette and Equitas Media Limited stay outside.
- **Buy legal work in priced phases.** Cash source approved first; recommended start is a priced joint scope for urgent IP triage and corporate coordination.
- **Pay and equity are decided last.** No salary approved (150,000 euro is an illustration); 2027 pay after roles, time and funding are known; a shareholding does not make an executive role.
- **Board.** Proposed board Shane, Pat, John, Tom; Chairman, CEO, CTO and company secretary shown as "[agree]". Shane's votes do not establish board control: chair, quorum, ties, conflicts and reserved matters to be set.
- **Founder continuity.** Second technical custodian; adviser quotes on death and illness cover; intended 250,000 euro continuity lump sum kept separate; Shane to appoint his own solicitor for will and family arrangements.

Dates in the papers

Mon 2 Nov inputs and decision record (passed). Wed 4 Nov Pat's review points, comparable quotes, first draft plan and cash forecast. Fri 6 Nov Zoom decisions and first review. Zoom 13 Nov; face-to-face 20 Nov; Zoom 27 Nov. Times, organiser and recorder blank.

Where John appears

- Proposed corporate coordinator of the legal work and compiler of the commitments record (or Tom); proposed board member; proposed 2% B shareholder and director, with independent review of his own terms.
- Named for three items due 2 Nov: company status list and standard constitutions; one-sentence summary of every signed, unsigned or verbal agreement; the commitments compilation.
- Owns, with the finance lead, the weekly KPI on overdue governance, IP, security and continuity actions.

Open for the conversation with Shane: what was decided on 30 Oct; who compiles; who is Noesis secretary and Chair; which companies Pat is to incorporate; the missing roster and register evidence; the legal route and cash source; Pat's possible sale of the practice. Pat's papers are a prepared framework: where they differ from Shane's own papers or from the meeting, Shane's decision governs.
