What I need from Shane to do my job and stay on top of it

Opening line: "I am working from your brief and Pat's papers. I will put what is mine first, and I need a few things from you to deliver it."

1. The records (task 1, task 6)

- The full company roster: legal names, CRO numbers, owners, directors and secretaries. Nine companies on your chart have no number I can find.
- Which companies you have asked Pat to incorporate, which are done, and the status of Tairseach and Odin Labs (your 22 Oct email says in incorporation, Pat's pack says proposed).
- Share register evidence for 805939 and the earlier Pat-to-Shane transfer.

2. The ten documents

- Which of the corrections from my 22 Oct note you have made or will make, and when I get the final versions: names in Documents 1 to 4, printed dates removed from 5 to 10, Document 2 errors, order of steps and clause 2.1, constitutions for the other companies, the rate card in Document 8, the Tairseach name.
- Who signs the Group Tax and Accounting Adviser slot in Document 10 if Pat's position changes.

3. Friday and the record

- Your notes and decisions from 30 Oct, with owners and dates, so I can set them against Pat's outcomes table. Who is recorder from now on.
- Who compiles the commitments record (me or Tom), with a new date; what you will supply on real estate, Dubai and the rest.
- Who is Noesis secretary: the 8 Oct brief says me, Pat's chart leaves it open. One consistent secretary arrangement for new companies.
- Board rules: I will draft chair, quorum, ties, conflicts, reserved matters and temporary authority as task 5, for your decision.
- Tom's security presentation, so I can do task 9 with him.

4. Pat, the legal route and a possible new firm

- What Pat wants, and which of it you support: the internal finance role and terms, a new external accountant, the funded phased legal route, equity and options for the three of us.
- Pat has indicated the practice may be sold. If so, who holds the registers, who is filing agent, and when do we appoint a new firm. I will not approach any firm before we agree.
- Legal route: Pat has a Cork IP solicitor in mind; I am to meet Barry Scannell at William Fry. I will set up scoping meetings, same agenda, no documents until confidentiality terms and your alignment.

5. Side projects

- Meridian is not incorporated. Agree shareholders, IP, boundary to Noesis and when to incorporate. Your position on Kairos, Ambrion, Childen and Mac Enterprises: in or out, owner, boundary.

For you only, to raise in conversation and not in writing: the Chairman seat and growing into Group Chairman; my full-time paid role; the equity step from 2% to 4% and Pat's request for options; independent review of my own terms as Pat's pack requires; recording the outcome as a board decision.

Close: "Please send your notes of Friday, and tell me what you are amending and by when. I will update the action list and bring you a decision page for Friday."
