Shane's decisions pack: seven points for John as chairman

Source: "Final Decisions for Pat and John" (11 points) and "The ten docs Upgrades, one page each", sent 02:12 Tue 10 Nov. Decision numbers below are Shane's.

#	Point	What the pack says	What to ask for in the room
1	**Shane's payment for the IP** (decision 1)	Founder shares that bring him to 5% of Asterial when the IP moves, plus a **fixed fee at round close**; replaces the bracketed EUR 10. Fee figure blank (Pat to recommend, Shane to set). "Subject to the tax team", tax limited to the cash received. Shane also sets each licence price in person (decision 3).	Shane is on both sides of Document 7. Ask for an independent valuation, approval by Pat and you (not Shane), a fee figure and cap before any term sheet, and the tax route in writing. The fee comes out of investors' round money: expect unfair-prejudice questions.
2	**Velocity out of the assignment** (decision 2)	Shane assigns alone; Mainly Velocity is no part of the assignment, authorship or warranties, but stays in the group and can license from Asterial.	Confirm what Velocity itself holds (Barber Republic Phase One of 17 Aug, UHL work, its own frameworks) and that nothing in ODIN depends on it. Then Document 9 warranties are Shane's alone.
3	**Who gets the round money** (decisions 10, 1)	Investor money goes into Asterial for new shares; the investor may also buy some of **Diarmuid's and Shane's own shares**; NOESIS sells nothing.	Shane and Diarmuid take value personally while NOESIS holders (you, Pat, Tom, family) bear the dilution (round plus the 12% pool). Ask for an independent view and for the pool dilution decided before an investor sees the plan.
4	**Your personal tax** (decision 11)	EUR 0.01 shares stay; "each person takes their own tax advice and carries their own tax"; companies meet payroll duty for directors and employees; all no-tax and value statements come out.	The tax falls on you as an executive holder (and on the Year 2 and 3 Class C awards). Take your own tax advice before subscribing; ask Pat who the "tax team" is and by when.
5	**OPEN: what the group keeps if Asterial is sold** (decision 7)	EUR 1 permanent licences, Zubelsala's copy unlocked, 36 months of core (Ring 1) access. Shane doubts a buyer would accept three years' core access. If kept, a receiver or liquidator sale triggers it. Changes all ten documents.	Pat's recommendation and whether it survives insolvency law; the tax on the conversion. Investors will price it at exit and in Rounds 1 and 2. Decide it now, or set a date before the term sheet.
6	**Your title and role** (corrections)	"Governance lead" title and verification stamps come out of Documents 1 and 10; the pack asks Pat and you to recommend whether Document 1 becomes a non-binding summary.	Settle your title (interim chairman, secretary), the witness for Documents 1 and 10 (independent), and independent review of your own terms. Not to be decided in the room by Shane alone.
7	**"Asterial and ODIN"** (Pat's 9 Nov email)	Shane: ODIN is the technology Asterial holds, so it has no Companies Office or beneficial ownership filing of its own.	Odin Labs Limited is a separate proposed company. Ask Pat which he meant, and whether the other companies can proceed to CRO and RBO now with final names.

YOUR ACTIONS TODAY (the pack asks you)

- **Asterial register:** how many shares Shane holds today (he needs it under 50,000 so the top-up to 50,000, 5% of 1,000,000, works).
- **Filings:** the Companies Office and beneficial ownership filings for each company.
- **Bank of Ireland:** bring the ORIGINAL passport, driving licence and Revenue letter; ask who else must attend the face-to-face.

Hold the line: agree structure and stop or go conditions today; sign incorporations, business names and the bank papers only, with final names. Nothing else signed with blank dates, an unsettled price or an untested tax route. Dubai Property Project agreement (decision 5) to be seen before any title promise is signed.
