

Executive Intelligence for Business Owners, Boards and Investors

Meridian Intelligence helps business owners, directors, investors and leadership teams make better business decisions through structured executive intelligence. Every engagement is personally led by John Webb O'Rourke, combining more than forty years of commercial experience with Meridian's proprietary Executive Intelligence Framework.

Rather than relying on a single viewpoint, Meridian examines complex business challenges across multiple executive disciplines before producing clear recommendations, practical actions and structured decision support. Whether the challenge involves commercial strategy, governance, finance, property, AI, business growth or investment, Meridian delivers disciplined executive thinking designed to provide broader analysis, greater confidence and more defensible decision making.

JOHN WEBB O'ROURKE

Founder | Executive Intelligence Adviser

John Webb O'Rourke has spent more than forty years advising businesses through growth, investment, restructuring and strategic change. His experience spans commercial negotiation, corporate governance, financial restructuring, property development, AI adoption, board leadership and executive decision making. He chairs AHL PLC and serves as Independent Non-Executive Director and Chair of the Audit and Risk Committee of United Hardware Limited.

Every Meridian engagement is personally directed by John. Meridian's Executive Intelligence Framework strengthens that judgement by examining each challenge from the most relevant executive perspectives before recommendations are finalised. The result is practical, commercially grounded advice that helps clients make better informed decisions.

THE SEVEN EXECUTIVE INTELLIGENCE DOMAINS

Commercial & Transaction Intelligence	Commercial strategy, acquisitions, partnerships, negotiations, revenue models, pricing strategy and commercial structuring.
Legal & Governance Intelligence	Corporate governance, directors' responsibilities, regulatory compliance, governance frameworks and commercial risk.
Finance & Restructuring Intelligence	Financial analysis, funding structures, restructuring options, investment readiness and strategic finance.
Property & Development Intelligence	Property transactions, planning matters, development opportunities, asset strategy and commercial property.
AI Strategy & Governance Intelligence	Practical AI adoption, governance, organisational readiness and responsible implementation.
Business Growth & Transformation Intelligence	Business improvement, operational performance, strategic growth opportunities and organisational transformation.
Investment & AI Equity Intelligence	Investment evaluation, AI-enabled commercial opportunities, equity structures and long-term value creation.

HOW MERIDIAN WORKS

Every engagement begins with your business challenge, strategic decision or commercial opportunity. Meridian identifies the Executive Intelligence Domains most relevant to the issue and applies a structured methodology to examine the challenge from multiple executive perspectives. Some engagements require only one or two domains. Others require several working together.

The findings are consolidated into a single **Executive Intelligence Brief** that clearly identifies strategic opportunities, principal risks, practical recommendations, immediate priorities and longer-term considerations. Every recommendation is reviewed personally by John Webb O'Rourke before being presented to the client.

TYPICAL ENGAGEMENTS

- Strategic business decisions
- Acquisitions and disposals
- Investment opportunities
- Board and governance advice
- AI strategy and adoption
- Property and development
- Business restructuring
- Commercial partnerships
- Executive decision support

THE MERIDIAN DIFFERENCE

Meridian is not about replacing executive judgement. It is about strengthening it. The objective is not to provide more information. The objective is to help clients make better business decisions.
